

Prevent the Invasion of African Swine Fever

What is African swine fever?

African swine virus is a terrible infectious virus, the fatality rate is as high as 100%. The worst thing is that there is no medicine to cure such disease as of now; hence, we must prevent the pig plague virus from invading Taiwan

What we cannot do?

- Do not bring any meat products from abroad upon arrival
- Do not purchase any meat products online and send the package to Taiwan
- Do not visit the livestock farm abroad

The government will enforce serious penalty to violators

1. When arriving in Taiwan, it is strictly prohibited to bring any meat products (online shopping, canned goods, vacuum packing..)
2. Highest fine will be: NT\$1,000,000
3. Importing, smuggling, online shopping of meat products illegally will be sentenced up to 7 years imprisonment and be fined NT\$3,000,000

Strictly Prohibited to Bring Any Type of Packed Meat Products Upon Arrival in Taiwan
